Upgradation of sector road by DLF and HUDA

Recently opened Raghvendra Marg (Erstwhile DLF Golf Course Road) caters to the growing vehicular traffic in the region. The expressway has been upgraded at a total cost of over Rs. 600 Cr. The ultra-modern, dual tier, toll-free and signal free expressway has drastically cut down travel time from the National Highway-8 and other surrounding areas to DLF5. Stretching over 8.3 kilometres, the road is designed by AECOM, the world's foremost engineering firm.

Other features of the road include exclusive service lanes for localized bi-directional traffic, sidewalks for pedestrians and an international level signage system.

Work is underway to add a green belt of approximately 50 acres and more than 5000 trees with lush landscaping. Apart from being beautifully landscaped, all services along the road are laid underground in dedicated areas, minimizing the need for frequent digging and traffic disruption.

This urban road system is further enhanced by the connectivity with Rapid Metro, which integrates with the Delhi Metro efficiently.

Raghvendra Marg (Erstwhile DLF Golf Course Road)

A woman with dark hair and glasses, wearing a white lace dress with fringe, stands barefoot on the edge of a swimming pool at night. She is looking towards the right. The pool has a curved edge and is surrounded by a paved area. In the background, there is a modern building with many windows and balconies, and several palm trees. The scene is illuminated by warm, golden light, likely from the setting or rising sun. The overall mood is serene and elegant.
